

Youth mental health

Teenage years can be challenging as bodies and brains go through changes.

Young adults who face mental health concerns may feel lost, embarrassed or frustrated. But they aren't alone.

1 in 6 U.S. youth aged 6-17 experience a mental health disorder each year.¹

Most commonly diagnosed mental disorders (ages 3-17)²

ADHD

approximately 6.0 million

Anxiety

approximately 5.8 million

Depression

approximately 2.7 million
